## 1. Basis of accounting

The unaudited preliminary consolidated financial statements are prepared under the historical cost convention, except for the revaluation of certain financial instruments as disclosed in our accounting policies.

## 2. Accounting policies

The unaudited preliminary consolidated financial statements comply with the recognition and measurement criteria of International Financial Reporting Standards (IFRS) as adopted by the European Union and issued by the International Accounting Standards Board (IASB) and with the accounting policies of the Group which were set out on pages 181 to 188 of the 2014 Annual Report and Accounts.

The Group has revised its tax accounting policy to reclassify certain income tax creditors as current liabilities. The Group believes this provides a more relevant presentation, whilst having no impact on the timing of expected cash flows. Accordingly, the consolidated balance sheets at 31 December 2014 and 31 December 2013 have been restated to reclassify £441.2 million and £362.6 million respectively of corporate income tax payable from non-current liabilities to current liabilities. No other changes have been made to the Group's accounting policies in the year ended 31 December 2015.

Whilst the financial information included in this preliminary announcement has been computed in accordance with IFRS, this announcement does not itself contain sufficient information to comply with all IFRS disclosure requirements. The Company's 2015 Annual Report and Accounts will be prepared in compliance with IFRS. The unaudited preliminary announcement does not constitute a dissemination of the annual financial report and does not therefore need to meet the dissemination requirements for annual financial reports. A separate dissemination announcement in accordance with Disclosure and Transparency Rules (DTR) 6.3 will be made when the annual report and audited financial statements are available on the Company's website.

#### **Statutory Information**

The financial information included in this preliminary announcement does not constitute statutory accounts. The statutory accounts for the year ended 31 December 2014 have been delivered to the Jersey Registrar and received an unqualified auditors' report. The statutory accounts for the year ended 31 December 2015 will be finalised on the basis of the financial information presented by the directors in this unaudited preliminary announcement and will be delivered to the Jersey Registrar following the Company's General Meeting. The audit report for the year ended 31 December 2015 has yet to be signed. The announcement of the preliminary results was approved on behalf of the board of directors on 4 March 2016.

## 3. Currency conversion

The reporting currency of the Group is pound sterling and the unaudited preliminary consolidated financial statements have been prepared on this basis.

The 2015 unaudited preliminary consolidated income statement is prepared using, among other currencies, average exchange rates of US\$1.5288 to the pound (2014: US\$1.6475) and €1.3782 to the pound (2014: €1.2410). The unaudited preliminary consolidated balance sheet as at 31 December 2015 has been prepared using the exchange rates on that day of US\$1.4734 to the pound (2014: US\$1.5581) and €1.3559 to the pound (2014: €1.2874).

The basis for calculating the constant currency percentage changes, shown on the face of the unaudited preliminary consolidated income statement, is described in the glossary attached to this appendix.

In certain markets, the impact of current, local economic conditions and trading circumstances on these businesses is sufficiently severe to indicate impairment to the carrying value of goodwill. Investment write-downs of £78.7 million (2014: £7.3 million) relate to certain non-core minority investments in the US where forecast financial performance and/or liquidity issues indicate a permanent decline in the recoverability of the Group's investment.

Gains on disposal of investments and subsidiaries of £131.0 million in 2015 include £43.6 million of gains arising on the sale of certain Kantar internet measurement businesses to comScore Inc in consideration for newly issued equity in the buyer; £29.7 million of gains arising on the sale of the Group's minority stake in e-Rewards; and £30.6 million of gains arising on the Group's equity interest in Chime Communications plc following its acquisition by Providence Equity Partners in conjunction with WPP.

Gains on disposal of investments and subsidiaries of £186.3 million in 2014 include £150.6 million of gains arising on the sale of the Xaxis for Publishers business to AppNexus Inc and the Kantar Media US television measurement business to Rentrak Inc. In both cases, consideration received was in the form of equity issued by the buyer.

Gains on remeasurement of equity interest on acquisition of controlling interest in 2015 primarily comprise gains of £131.7 million in relation to the acquisition of a majority stake in IBOPE in Latin America.

Restructuring costs of £106.2 million (2014: £127.6 million) comprise £69.5 million (2014: £88.7 million) of costs (including £52.0 million of severance costs) arising from a structural reassessment of certain of the Group's operations, primarily in the mature markets of Western Europe; and £36.7 million (2014: £38.9 million) of costs resulting from the project to transform and rationalise the Group's IT services and infrastructure. In 2015, IT asset write-downs comprise £29.1 million of accelerated depreciation of IT assets in Asia and Europe.

Operating profit includes credits totalling £31.6 million (2014: £24.9 million) relating to the release of excess provisions and other balances established in respect of acquisitions completed prior to 2014.

## 20. Going concern and liquidity risk

In considering going concern and liquidity risk, the directors have reviewed the Group's future cash requirements and earnings projections. The directors believe these forecasts have been prepared on a prudent basis and have also considered the impact of a range of potential changes to trading performance. The directors have concluded that the Group should be able to operate within its current facilities and comply with its banking covenants for the foreseeable future and therefore believe it is appropriate to prepare the financial statements of the Group on a going concern basis.

At 31 December 2015, the Group has access to £6.8 billion of committed facilities with maturity dates spread over the years 2016 to 2043 as illustrated below:

		2016	2017	2018	2019	2020+

Given the strong cash generation of the business, its debt maturity profile and available facilities, the directors believe the Group has sufficient liquidity to match its requirements for the foreseeable future.

#### **Treasury management**

The Group's treasury activities are principally concerned with monitoring of working capital, managing external and internal funding requirements and monitoring and managing financial market risks, in particular risks from movements in interest and foreign exchange rates.

The Group's risk management policies relating to foreign currency risk, interest rate risk, liquidity risk, capital risk and credit risk are presented in the notes to the consolidated financial statements of the 2014 Annual Report and Accounts and in the opinion of the Board remain relevant at 31 December 2015.

#### 21. Financial instruments

The fair values of financial assets and liabilities are based on quoted market prices where available. Where the market value is not available, the Group has estimated relevant fair values on the basis of publicly available information from outside sources or on the basis of discounted cash flow models where appropriate.

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into levels 1 to 3 based on the degree to which the fair value is observable, or based on observable inputs:

Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 fair value measurements are those derived from inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices);

Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

## Payments due to vendors and liabilities in respect of put options

Future anticipated payments due to vendors in respect of contingent consideration (earnout agreements) are recorded at fair value, which is the present value of the expected cash outflows of the obligations. Liabilities in respect of put option agreements are initially recorded at the present value of the redemption amount in accordance with IAS 32 and subsequently measured at fair value in accordance with IAS 39. Both types of obligations are dependent on the future financial performance of the entity and it is assumed that future profits are in line with directors' estimates. The directors derive their estimates from internal business plans together with financial due diligence performed in connection with the acquisition. At 31 December 2015, the weighted average growth rate in estimating future financial performance was 20.3%, which reflects the prevalence of recent acquisitions in the faster growing markets and new media sectors. The risk adjusted discount rate applied to these obligations at 31 December 2015 was 1.7%.

A one percentage point increase or decrease in the growth rate in estimated future financial performance would increase or decrease the combined liabilities due to earnout agreements and put options by approximately £11.9 million and £19.0 million, respectively. A 0.5 percentage point increase or decrease in the risk adjusted discount rate would decrease or increase the combined liabilities by approximately £11.6 million and £11.9 million, respectively. An increase in the liability would result in a loss in the revaluation of financial instruments (note 5), while a decrease would result in a gain.

#### Other investments

The fair value of other investments included in level 1 are based on quoted market prices. Other investments included in level 3 are unlisted securities, where market value is not readily available. The Group has estimated relevant fair values on the basis of publicly available information from outside sources or on the basis of discounted cash flow models where appropriate. The sensitivity to changes in unobservable inputs is specific to each individual investment.

<sup>&</sup>lt;sup>1</sup> Payments due to vendors (earnout agreements) are reconciled in note 16.

## 22. Principal risks and uncertainties

The Board has carried out a robust assessment of the principal risks and uncertainties affecting the Group for the year ended 31 December 2015 and these are updated and summarised below:

#### **Clients**

- The Group competes for clients in a highly competitive industry and client loss may have a material adverse effect on the Group's market share and its business, revenues, results of operations, financial condition or prospects.
- The Group receives a significant portion of its revenues from a limited number of large clients and the loss of these clients could have a material adverse effect on the Group's prospects, business, financial condition and results of operations.

### **Data Security**

- Existing and proposed data protection laws may restrict the Group's activities and increase our costs.
- The Group is carrying out an IT transformation project and will rely on third parties for the performance of a significant part of its information technology and operational functions. A failure to provide these functions could have an adverse effect on the Group's business.
- The Group stores, transmits and relies on critical and sensitive data. Security of this type of data is exposed to escalating external threats that are increasing in sophistication as well as internal breaches.

#### **Operational**

■ The Group's performance could be adversely impacted if it failed to ensure adequate internal control procedures are in place in relation to the Group's increased proprietary trading.

#### **People and Succession**

■ The Group's performance could be adversely affected if it were unable to attract and retain key talent or had inadequate talent management and succession planning for key management roles at the parent and operating companies.

#### Regulatory, Sanctions, Anti-Trust and Taxation

- The Group may be subject to regulations restricting its activities or effecting changes in taxation.
- The Group is subject to anti-corruption, anti-bribery and anti-trust legislation and enforcement in the countries in which it operates.
- Civil liabilities or judgements against the Company or its directors or officers based on United States federal or state securities laws may not be enforceable in the United States or in England and Wales or in Jersey.
- The Group is subject to laws of the United States, EU and other jurisdictions regulating and imposing sanctions on the supply of services to certain countries. Failure to comply with these laws could expose the Group to civil and criminal penalties.

## Glossary and Basis of Preparation

#### Average net debt

Average net debt is calculated as the average daily net bank borrowings of the Group. Net debt at a year end is calculated as the sum of the net borrowings of the Group, derived from the cash ledgers and accounts in the balance sheet.

#### Billings and estimated net new billings

Billings comprise the gross amounts billed to clients in respect of commission-based/fee-based income together with the total of other fees earned. Net new billings represent the estimated annualised impact on billings of new business gained from both existing and new clients, net of existing client business lost. The estimated impact is based upon initial assessments of the clients' marketing budgets, which may not necessarily result in actual billings of the same amount.

#### **Constant currency**

The Group uses US dollar-based, constant currency models to measure performance. These are calculated by applying budgeted 2015 exchange rates to local currency reported results for the current and prior year. This gives a US dollar – denominated income statement which excludes any variances attributable to foreign exchange rate movements.

#### Free cash flow

Free cash flow is calculated as headline operating profit before non-cash charges for share-based incentive plans, depreciation of property, plant and equipment and amortisation of other intangible assets, including dividends received from associates, interest received, investment income received, proceeds from the issue of shares, and proceeds from the disposal of property, plant and equipment, less corporation and overseas tax paid, interest and similar charges paid, dividends paid to non-controlling interests in subsidiary undertakings, purchases of property, plant and equipment and purchases of other intangible assets.

#### Net sales/Net sales margin

Net sales are revenue less direct costs. Net sales margin is calculated as headline PBIT (defined below) as a percentage of net sales. The Group has previously used the terms gross margin and gross profit to refer to net sales.

#### **Headline earnings**

Headline PBT less headline tax charge and non-controlling interests.

#### Headline operating profit/Headline PBIT

Profit before finance income/costs and revaluation of financial instruments, taxation, gains/losses on disposal of investments and subsidiaries, investment write-downs, goodwill impairment and other goodwill write-downs, amortisation and impairment of acquired intangible assets, Group restructuring costs, IT asset write-downs, share of exceptional gains/losses of associates and gains/losses on remeasurement of equity interest on acquisition of controlling interest.

#### **Headline PBT**

Profit before taxation, gains/losses on disposal of investments and subsidiaries, investment write-downs, goodwill impairment and other goodwill write-downs, amortisation and impairment of acquired intangible assets, Group restructuring costs, IT asset write-downs, share of exceptional gains/losses of associates, gains/losses arising from the revaluation of financial instruments, and gains/losses on remeasurement of equity interest on acquisition of controlling interest.

#### Headline tax charge

Taxation excluding tax charge/deferred tax relating to gains on disposal of investments and subsidiaries, net deferred tax credit in relation to the amortisation of acquired intangible assets and other goodwill items and tax credit relating to restructuring costs.

#### Operating margin

Headline operating profit as a percentage of net sales.

#### Pro forma ('like-for-like')

Pro forma comparisons are calculated as follows: current year, constant currency actual results (which include acquisitions from the relevant date of completion) are compared with prior year, constant currency actual results, adjusted to include the results of acquisitions for the commensurate year in the prior year. The Group uses the terms 'pro forma' and 'like-for-like' interchangeably.
